Chandra helps find 'bulls-eye' pulsar in supernova remnant

Using two telescopes, including NASA's Chandra X-ray Observatory, astronomers have found the "bulls-eye" pulsar in a bright ring of high-energy particles in a distant supernova remnant. This discovery will help scientists better understand how neutron stars channel enormous amounts of energy into particles moving near the speed of light. The Marshall Center manages the Chandra program.

Marshall cafeterias in Bldg. 4610, 4203 and 4471, Charlie's Grill in Bldg. 4200 and Barbershop in Bldg. 4203, closed July 5

Free blood pressure screenings for Marshall team, noon-3 p.m. weekdays at the Medical Center, Bldg. 4349

Wellness Center ribbon cutting ceremonies Thursday

All Marshall team members are invited to the grand opening and ribbon cutting ceremonies Thursday at the Wellness Center, Bldg. 4315. The event begins at 10 a.m. The Wellness Center features state-of-the-art exercise equipment, 44 pieces of cardio equipment including 15 treadmills, new wood floors for the racquetball and basketball courts, aerobics classes, yoga, kick boxing and new air conditioning.
